**33. Read the following passage and answer the question that follows:**

An aged hermit resided in the Lun Mountains of Korea. Many people sought his advice for he was a source of wisdom and was conversant in the miraculous arts. One day, a woman came and pleaded with him to help her regain her husband's lost fondness. "He was so loving and caring before he left for the wars," she lamented. "He has returned after three years but now he is indifferent and aloof."

"War does these things to men," said the hermit pensively. "They say you can make a potion that can kindle love in the person who

consumes it,” said the woman.

“I surely can make that potion, it is true, but I lack one of the main ingredients that go into its making”, said the hermit. “Which is that?”, asked the woman. “It is a tiger’s whisker”, replied the patient hermit.

The woman left promising to get what he required. The next day she went in search of a tiger and finally saw one on the banks of a large river. The tiger snarled when he saw her and she retreated. She returned to the spot the next day. Again, the tiger snarled and again she retreated. However, she kept going to the place and gradually the animal got used to her presence and stopped snarling.

She began to bring him food. In course of time, the tiger became so friendly that he would come right up to her to take the food. One day she hesitantly reached out and patted his head. A few days later, she ran her hand down the side of his face. Moreover, while doing so she deftly pulled out one of his whiskers. Thereafter she rushed to the hermit’s house with the whisker.

“I’ve got it!” she said, triumphantly. “Good,” said the hermit.

He took the whisker of tiger to the fireplace and dropped it into the fire.

“What have you done!” said the woman, stunned. “You promised to make me a magic potion with this!”

“You don’t need one,” said the hermit, smiling gently. “Tell me, how did you win the tiger’s affection? Naturally, you had to deal with him with gentleness and a great deal of patience. Would a man be less responsive than a savage and blood thirsty beast? Go and win over your husband as you did the tiger.”

The woman turned over what the hermit had said, in her mind, as she slowly made her way home. When she saw her husband her first instinct was to turn away, then remembering the tiger and the hermit’s words, she checked herself and moved forward with a smile on her face.

**The hermit asked the woman to get a whisker of the tiger as\_\_\_\_\_.**

- A. He wanted her to be a good huntress.

**34. Read the following passage and answer the question that follows:**

But I never wanted to shoot the mighty elephant. I watched him ferociously beating his bunch of grass against his knees, swarmed with the **preoccupied grandmotherly** air that the pachyderms have. It seemed to me that it would be a blatant murder to shoot him, especially now. He was looking as harmless as ever. Moreover, I had never shot an elephant and never wanted to (Somehow it always seemed worse to kill large animals). To top this confusion, there was the beast’s owner to be considered. But I had got to act quickly. I turned to the experience personified hunting clan of ‘Burmans’ who had been there when we arrived and asked them how the elephants had been behaving. They all in a chorus said the same thing; which was that he took no notice of you if you left him alone, but he might charge if you went too close to him.

**A ‘clan’ is\_\_\_\_\_.**

- A. A Group of people united by actual or perceived association and ancestry.
- B. A family unit found in selected parts of the world.
- C. A group of hunters who help novice hunters in getting a good shot.

**36. Read the following passage and answer the question that follows:**

Ahmed, a professional, who had worked in an office for many years had a fearful dream one night. In it, he found himself on a land where small slug-like animals with slippery tentacles existed on people’s bodies. The people tolerated the loathsome creatures because after many years they would grow into elephants, which then would become the nation’s system of transport, carrying everyone wherever they wanted to go. Ahmed all of a sudden, became conscious that he himself was covered with these things. As a result, he woke up in the middle of the night screaming. In a vivid sequence of pictures, this dream indicated to Ahmed what he had never been able to put into words; he saw himself as letting the society feed on his body in his early years so that it would carry him when he retired. He later threw off the ‘security blanket’ and took up freelance work and became an entrepreneur.

**The statement that ‘he later threw off the ‘security blanket’ means that \_\_\_\_\_.**

**41. Read the following passage and answer the question that follows:**

For virtue in a being, courage is not only the basis for it but also its manifestation. Faith, hope, charity and all the rest can never become virtues unless they are complemented with courage. There are broadly. two types of courage: the former one is an emotional state, which urges a man to risk injury or death, it is called physical courage. The latter, is more reasoning attitude which enables him to take gently, his career, happiness, his whole future or his judgment of what he perceives either right or worthwhile, is moral courage.

I have had the fortune of knowing many men, who had immense physical courage, but were found lacking in moral courage. Some of them occupied high offices, but they failed to be great in themselves as they lacked moral courage. On the other hand, I have observed men who indisputably possess moral courage but were very careful about partaking physical risks. Nevertheless, never have I chanced upon a man with moral scruples, who could not face a situation boldly, when it was really necessary.

**43. Read the following passage and answer the question that follows:**

Nationalism, of course, is a curious phenomenon, which at a certain stage in a country's history gives life, growth and unity but, at the same time, it has a tendency to limit one, because one thinks of one's country as something different from the rest of the world. One's perception changes and one is continuously thinking of one's own struggles and virtues and failing to the exclusion of other thoughts. The result is that the same nationalism, which is the symbol of growth for people, becomes a symbol of the cessation of that growth in mind.

Nationalism, when it becomes successful, sometimes goes on spreading in an aggressive way and becomes a danger internationally. Whatever line of thought you follow, you arrive at the conclusion that some kind of balance must be found. Otherwise, something that was good can turn into evil. Culture, which is essentially good becomes not only static but also aggressive and something that breeds conflict and hatred when looked at from a wrong point of view. How do you find a balance, I don't know.

Apart from the political and economic problems of the age, perhaps, that is the greatest problem today because behind it there is tremendous search for something, which it cannot find. We turn to economic theories because they have an undoubted importance. It is folly to talk of culture or even of God. When human beings starve and die. Before one can talk about anything else one must provide the normal essentials of life to human beings. That is where economies come in. Human beings today are not in mood to tolerate this suffering, starvation, and inequality when they see that the burden is not equally shared. Others profit while they only bear the burden.

**Aggressive nationalism \_\_\_\_\_.**

- A.** Breeds threat to international relations.
- B.** Leads to stunted growth.
- C.** Endangers national unity.
- D.** Isolates a country.

**45. Read the following passage and answer the question that follows:**

The Eiffel Tower was built for the International Exhibition of Paris of 1889, commemorating the centenary of the French Revolution. The Prince of Wales, later, King Edward VII of England, opened the tower. Of the 700 proposals submitted in a design competition, Gustave Eiffel's was unanimously chosen. However, it was not accepted by all at first and a petition of 300 names including those of Maupassant, Charles Gamier protested its construction. At 300 meters, it was the world's tallest building until 1930.

In the year 1889, Gustave Eiffel began to fit the peak of the tower as an observation station to measure the speed of the wind. He also encouraged several scientific experiments including Foucault's giant pendulum, a mercury barometer and the first experiment of radio transmission. In 1898, the signals were received from the tower.

After Gustave Eiffel's experiments in the field of meteorology, he had begun to look, at the effects of wind and air resistance, the science that would later be termed aerodynamics, which has become a large part of both military and commercial aviation as well as rocket technology. The tower was almost torn down in 1909, but was saved because of its antenna used both for military and other purposes and the city let it stand after the permit expired.

The tower played an important role in capturing the infamous spy 'Mata Han' during World War I. From 1910 and on, the Eiffel Tower became a part of the International Time Service. French Radio and French television have also made use of its stature.
